World History

World history is comprised of macrohistory – the study of human history across boundaries. World historians examine developments that go beyond single states, cultures, and regions, including movements (of peoples, cultures, commodities, diseases, and ideas), cross-cultural contact, and exchange known as cultural diffusion.

Religion/Sacred/ Philosophy

Religion is at the core of the human experience. It is the pathway that individuals take in order to make sense of our existence and what may happen after we cease to exist in this world. Within religion people create sacred places, objects, clothing, rituals and much more.

LEARN MORE

Social Normatives/ Anthropology

People live out their daily lives without giving much thought to why they do what they do. We adopt much of our habits from our parents and slowly over time choose from other people groups that which we integrate into our life.

LEARN MORE

Intellect/Education

For thousands of years children learned what was needed to survive and thrive from their parents and communities. Communities over time established more formal settings for children to study. As societies focused on more specialized skills, children were expected to spend more of their time in classrooms. In just the last half century,
